-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 20 January 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In method claim 1 the follow are examples of indefiniteness:

- In line 2, the word “thereof,” renders the claim indefinite since it is unclear what applicant refers to. For purposes of furthering prosecution of the present case said phrase will be assumed to mean --of said row of stalls--.
- In line 8, the limitation "the far end" lacks antecedent basis.
- The phrase “the milk producing animal” is written in lines 8, 10, and 12, however, it appears that applicant may intend to refer to a plurality of animals. This repeated phrase is confusing and makes the claim limitations unclear.
- In line 15, the claim recites the limitation “the first, last and n’t h identifications,” however, there is insufficient antecedent basis for this limitation in the claim. Further, the phrase from line 14 to 17 is awkward and confusing and should be reworded.

3. Apparatus claim 13 is replete with similar instances of indefiniteness, and should be reviewed and corrected appropriately.

Art Unit: 3644

4. Claims 3, 4 and 15, recite the limitation "the second, last, and (n-1)'th identifications." Claim 6 recites the limitations "the i'th identification," and the "i'th stall." Claim 7 recites the limitation the "q'th identification," and "the q'th stall." There is insufficient antecedent basis for these limitations in the claims.
5. Claims 2-12 and 14-20 are rejected as being dependant upon the rejected subject matter of claims 1 and 13.

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-8, and 11-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Bjork et al. (USPN 6,516,744).

Bjork et al, (Bjork) discloses the claimed apparatus and method, as best understood, comprising a plurality of identification members 20-26 for identifying a milking animal and monitor its location as it moves about a milking system and rows of stalls 16, 18. The identification members 20-26 communicate via a computer system (control device 12) with transponders connected to the individual animal in order to identify a file of information associated with the animal.

***Claim Rejections - 35 USC § 103***

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claims 9, and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bjork as applied to claim 1 above, and further in view of Tucker (USPN 5,959,526).

Bjork discloses the claimed invention, as best understood, except he does not positively disclose recording the weight of the milk produced by each identified animal. Tucker discloses a device in the same field of invention and teaches the step of measuring and recording the amount of milk produced by an animal and using the milk weight value to assist in identifying the animal. It would have been obvious to one having ordinary skill in the art at the time the invention was made to measure and record the weight of the milk produced by each animal in order to provide an additional characteristic to identify the animal with.
